

HAVELLS

6 YEAR WARRANTY*

**YOUR TRUST,
OUR PROMISE.**
FOR A SHOCKPROOF LIFE.

Experience the Latest & Safest in **Building Circuit Protection**

*Warranty for a period of six years on MCB & RCCB when fitted in "Havells" distribution boards. When fitted in any other distribution board, warranty period is one year.

LIST PRICE
w.e.f. 20th December, 2019

CONTENT

A

Protection Device

• Miniature Circuit Breaker (MCB)	06
• Isolator	07
• MCB Changeover	07
• Residual Current Circuit Breaker (RCCB)	08
• Residual Current Circuit Breaker with Overload & Short-Circuit Protection (RCBO)	08
• Solutions for Downstream Protection	09
• Surge Protection Devices	11

B

Distribution Boards

• QVE Plus Distribution Boards	15
• Metalica Distribution Boards	15
• DBoxx Distribution Boards	15
• QVE Series Distribution Boards	15
• Distribution Board with Lock	16
• Phase Selector Distribution Boards	16
• Utility Distribution Boards	17
• Special Application Distribution Boards	18
• TV-Telephone Distribution Boards	19
• DCDB/Solar Combiner Box	19
• IP 65 Enclosure	20

C

Industrial Plug & Connector

Plug	24
Connectors	24
Wall Mounted Socket	24
Panel Socket	24
Interlocking Socket	25
Plug & Socket for Reefer Container	25
Solution with Insulated Plug & Socket	25

D

Control & Monitoring Devices

• Automatic Changeover Devices	28
• Time Switch	29
• Modular Contactors	30

E

Photovoltaic Switchgear Range

Photovoltaic Disconnecter	31
Photovoltaic Fuse Link	31

PROTECTION DEVICES

Experience the Latest & Safest in Building Circuit Protection

MCB

'B' Series SP MCB

(In accordance with IS/IEC 60898-1) 240 V, 50 Hz, 10 kA Suitable for lighting and other domestic loads

HSN Code - 8536

Rating	SP Cat. No.	List Price in ₹ Per Unit
6-32 A	DHMGCBSPF006-032	200.00
40 A	DHMGCBSPF040	462.00

'C' Series MCB

(In accordance with IS/IEC 60898-1) 240 V/415 V, 50 Hz, 10 kA Suitable for Motor and other Inductive loads

SRCD DBOXx

Plug & Socket

MCB Enclosure

Havells DBOXx SRCD is ready plug & play all-in-one device that provides protection to humans from electric shock due to direct or indirect contact as well as provides protection from overload and short circuit faults.

It is designed such that user can easily upgrade his installation by replacing existing socket boxes and get built-in protection.

DISTRIBUTION BOARDS

DBoxx

Havells DBoxx Distribution Board is a perfect blend of aesthetics and functionality. The range has been designed with unique features ensuring user safety, convenience, easy handling, and quick, simple installation.

Features:

- Corrosion free Door
- Push to open, see through glass cover
- Available in SPN and TPN variant
- Superior color finish in Mist White and Coin Grey
- Fitted with masking sheet, raised neutral and earth bar

Introducing QVE Plus Distribution Boards

AFTER ALL, A PROTECTOR NEEDS TO BE TOUGH.

Features

- Robust core with smooth curve semantic
- Innovative textured finish with optimized play of matte and gloss
- Multiple premium colour finishes

INDUSTRIAL PLUG & CONNECTOR

Industrial plug and socket are used to provide power in industrial environments and areas exposed to corrosive chemicals, extremes of weather and rough use with high demands on safety, reliability and durability. Havells provides a comprehensive range of plug and socket to suit all environments & applications, manufactured to the highest quality and having robust ergonomic design. Havells industrial plug & socket range adopts 'preventing incorrect insertion' design and its high grade thermoplastic material ensures good electric insulation, high impact resistance, dustproof, damp proof and watertight connections. Nickel plated contacts provide better corrosion resistance in aggressive environments and at high degrees of air humidity. HAVELLS provides IP 44 range of plug & socket, protected against splashing and spraying of water, and IP 67 weatherproof plug and socket range that can withstand temporary immersion in water. Some typical applications are highlighted below.

Application

Agriculture	Mobile or portable equipment or appliances used or stored on sheltered premises.	Outdoor installation of pumping, ventilation, drying equipment.
Chemical industry	Indoors on premises for storage and maintenance purposes where connections are not exposed to the risk of immersion or chemicals.	On premises without risk of explosions but where the connections are exposed to chemicals and subject to possible immersion.
Construction sites and shipyards	On covered construction sites sheltered against weathering but exposed to splashing with water.	On outdoor construction sites where the connections are left on damp ground exposed to freezing, dust and weathering.
Sports complexes and other places of public entertainment, TV and film studios	On sheltered premises protected against the weather, though exposed to splashing, without high connected loads.	Outdoor connections exposed to rain, snow, mud, freezing and other critical weather conditions. Where rated safety is required. Where high voltage for lighting installations, T.V. and audio are foreseen.
Food industry	In sheltered locations, on indoor premises used for storage and maintenance.	In locations subject to washing by hosing down and where connections are subject to heavy duty.
Heavy industry	In sheltered warehouses, maintenance workshops, assembly and moulding areas.	In rolling mills, foundries, blast furnaces, etc., where the connections are exposed to dust, metallic shavings, coolants and are subject to vibrations and impact.
Light industry	Locations without high humidity or ambient pollution serving for assembly, moulding, maintenance and storage	On premises subject to cleaning by means of chemical solvents. Also where heavy loads require high safety in connections.
Installations for IT centres	For electrical connections executed above floor level.	For electrical connections under raised floors with risk of immersion. Where heavy loads require high safety in connections.
Ports	In sheltered locations such as docks, repair shops, offices, etc.	Quays, docks, piers, etc. where there is risk of high waves and partial flooding.
Airports	In sheltered locations, hangars, repair shops, warehouses.	Outdoors for connection between mobile or portable appliances and aircraft.
Water treatment plants	Indoor use in repair shops, etc.	In all locations with risk of flooding and for outdoor use with pumps, aeration and ventilation systems.

CONTROL & MONITORING DEVICES

Modular Contractor

AUTOMATIC MODULAR CONTACTOR

In automatic contactors the switching operation depends solely on the availability of coil supply. When coil supply is provided sufficient electromagnetic force is generated for closing the NO main contacts or opening the NC main contacts. In the absence of coil supply, the contacts revert to their original position.

AUTOMATIC MODULAR CONTACTOR WITH MANUAL OVERRIDE

Automatic Contactors with manual override knob have a manual over-ride switch to select between three function modes and 4 operating positions.

- Automatic Mode: It is the normal operating mode i.e. Contactor is operational (ON) when Coil voltage is applied and vice versa.
- ON Mode :
 - Temporary "ON" position: When manual knob is not locked at ON position – the main contacts remain ON as long as coil supply is absent. When oil supply becomes available, the contactor automatically reverts to automatic mode.
 - Permanent "ON" position: Here, the contactor is operational (ON) irrespective of the availability of coil supply.
- OFF Mode: Here, the contactor is shutdown irrespective of the availability of coil supply.

Manual override option provides customers with the following features:

- Functional test prior to start/commissioning
- High degree of safety and availability in case of automation system failure
- Testing or repairs can be carried out safely, reliably and quickly without interrupting other automatic functions.
- Force ON and Force OFF feature allows user to run high energy load during low tariff periods only, thereby over-ruling the normal operation of contactor at all times.

Time switches are used in residential, commercial and industrial premises to improve comfort and save energy by switching loads automatically as per real time. Havells offers a variety of time switches to precisely meet the requirements of different applications. The range offers several feature benefits such as different options of minimum switching time, internal battery to enable the timing function in case of power failure, daily and weekly versions, simple and compact design.
